

1.6 Revisions and Updates

VDOT plans to issue updates and revisions to this manual which will be found at the VDOT website. Updates and revisions would normally be anticipated no more than twice a year. Users of the manual should review the VDOT website periodically and prior to beginning design or preparing a plan submittal, to determine the date of the most recent updates. Users that cannot access the information on the Internet may phone the VDOT Hydraulics Section in the nearest district office or in Richmond, Virginia at (804) 786-2534. When revisions are available, the user will be notified via a “Revisions” file on the VDOT website at the location where the manual may be viewed and/or downloaded. This file will contain links that will take the user to the actual page (s) that have been revised. The file also briefly describes each revision. All revised material (where possible) will be shaded so the user will be able to recognize it as having been changed. The shaded material within any given chapter will remain shaded until the next revision, at which time all previous shading in that chapter will be removed.
