# CONSTRUCTION RUNOFF CONTROL INSPECTION FORM (CRCIF) C-107 CONTRACTOR INSPECTION SHEET

VI	DOT

	Project NameriD UPC	•		
	Contractor	•		
	Inspection Date			
Type of	Inspection: (Check Appropriate Block)			
(1) After	Measurable Storm Event   Estimated Total Rainfall of Storm Event inches			
(4) Month	dule 1: (7 Calendar Days/5 Business Days) (3) Schedule 2: (Monday and Thursday/ 4 Business Days) hly Schedule ther Describe:			
Weather Clear [ Cold [	Conditions (At Time of Inspection) (Check All Appropriate)  Sunny Partly Cloudy Cloudy Cloudy Hot			
Is there a	any discharge occurring from construction site at time of inspection?  No		YES2 NO3	
If yes, is Yes [	discharge compliant with the Erosion and Sediment Control Regulation and VPDES Construction Permit Requi	rements?		
If no, des	scribe conditions of discharge:			
ITEM #	ESC INSPECTION QUESTIONS	N/A <sup>1</sup>	YES <sup>2</sup>	NO <sup>3</sup>
1	Have stabilization activities been initiated on all disturbed areas that have reached final grade or that will remain dormant for more than 14 days?			
2	Have stabilization activities been completed within 7 days of initiation?			
3	Have disposal/borrow and soil stockpiles areas been stabilized and/or protected with sediment trapping measures?			
4	Have perimeter controls been constructed as a first step prior to initiation of land disturbing activities (including clearing or grubbing)?			
5	Are perimeter and other erosion and sediment control structures and systems being maintained, inspected and repaired, as necessary, to ensure functionality?			
6	Have all land-disturbing activities occurred within the approved ESC plan area?			
7	Have earthen structures, such as dams, dikes, and diversions, been immediately stabilized upon installation?			
8	Have sediment basins and traps been constructed according to plans, specifications, and/or standards?			
9	Are all cut and fill slopes at final grade adequately stabilized?			
10	Is concentrated water flowing through adequate slope drains, flumes, or other non-erodible conveyances on cut or fill slopes?			
11	Is stormwater runoff containing sediment or turbidity being properly treated prior to discharge?			
12	Where water seeps from slope faces, has adequate drainage or erosion protection been provided?			
13	Do all operational storm sewer and culvert inlets have inlet protection in accordance with plans, specifications, and/or standards?			
14	Are constructed stormwater conveyance channels and ditches stabilized with appropriate channel lining and/or outlet protection?			
15	Is in-stream construction being conducted using measures to minimize channel impacts?			
16	Are temporary stream crossings of non-erodible material installed at locations where construction equipment must cross?			
17	Are all water quality permit requirements being adhered to?			
18	Is re-stabilization of in-stream construction areas complete before leaving the site?			
19	Are utility trenches stabilized properly according to the specifications?			
20	Is effluent from dewatering operations being filtered (including in-stream structure dewatering)?			
21	Are construction entrances installed at appropriate locations and being maintained properly?			
22	Is any sediment tracking on public roadways cleaned-up at the end of each work day?			

ITEM#	ESC INSPECTION QUESTIONS (CONTINUED)	N/A <sup>1</sup>	YES <sup>2</sup>	NO <sup>3</sup>
23	Have all temporary ESC measures that are no longer needed been removed and have all such areas been regraded, as necessary, and stabilized?			
24	Are properties and waterways adjacent to the project site being adequately protected from accidental land disturbance, potential pollutant discharge, erosion, flooding, and sedimentation from the project site?			
25	Are all discharges from the construction site allowable under the VPDES construction permit?			
26	Are all ESC deficiencies from previous reports being addressed within allowable/established time frames?			
27	Is the location of the on-site rain gage identified on the record set of plans or in other appropriate SWPPP documents?			
28	Is the data from the daily observations of the rain gage being documented and included in the SWPPP in accordance with the Specifications and/or the SWPPP GIS?			
ITEM#	POLLUTION PREVENTION (P2) INSPECTION QUESTIONS	N/A <sup>1</sup>	YES <sup>2</sup>	NO <sup>3</sup>
29	Have all potential pollutant generating activities present on the site been identified in the SWPPP and addressed with an approved Pollution Prevention Plan?			
30	Is the person or contractor responsible for implementing and maintaining the pollution prevention practices for each potential pollutant generating support activity identified in the approved Pollution Prevention Plan?			
31	Has pollution prevention awareness been provided to appropriate personnel?			
32	Are chemicals being properly stored (e.g., under cover or within secondary containment) and handled?			
33	Are storage containers labeled to describe contents?			
34	Are construction products, materials, and wastes being properly stored, handled, and disposed of?			
35	Is the site absent of loose or uncontrolled trash and debris?			
36	Is the site absent of spills, leaks, or stains (e.g., from hydraulic hoses, vehicle/equipment maintenance and fueling operations, etc.)?			
37	Are chemicals, soaps, solvents, and wash water from construction materials (e.g., from release oils and curing compounds from hand tools) prevented from leaving the site?			
38	Is vehicle wash water free of soaps/detergents and properly treated before leaving the site?			
39	Is concrete wash-out being directed into a properly installed leak-proof container or leak-proof settling basin?			
40	Are concrete wash-out areas being properly maintained and utilized?			
41	Are all other unauthorized non-stormwater discharges prevented from leaving the site (including untreated dust control water)?			
42	Are all P2 deficiencies from previous reports being addressed within allowable/established time frames?			
ITEM#	SWPPP UPDATE AND MODIFICATION QUESTIONS	N/A <sup>1</sup>	YES <sup>2</sup>	NO <sup>3</sup>
43	Is the SWPPP being modified, amended and updated in accordance with the specifications and/or the SWPPP GIS?			
44	Is a record set of plans being maintained and updated to document SWPPP changes?			
45	Are modifications, amendments or updates to the SWPPP being signed by the contractor and VDOT?			

By signing below, those persons doing so certify that the C-107 has been completed based on the actual field conditions at the time of the inspection and accurately reflects those conditions. Where no deficiencies have been identified, those signing below further certify that the construction activity is in compliance with the SWPPP and the VPDES Construction General Permit. It is encouraged that photos be taken to support findings.

CONTRACTOR: See Note 2 on Sheet 4				
	Name of ESCCC Person	Signature of ESCCC Person	Certification Number	Date
VDOT: See Note 3 on Sheet 4				
	Name of VDOT Certified Inspector	VDOT Certified Inspector Signature	Certification Number(s)	Date

Provide copies to 1.) the Contractor, 2.) the VDOT Project Inspector and 3.) the Project Engineer/ RLD (See Note 4 on Sheet 4)

<sup>1 –</sup> N/A: Not Applicable

<sup>2 -</sup> YES: All related contract items, requirements, plans, specifications, standards, and permits pertaining to this question are being satisfied

<sup>3 -</sup> NO: See Note 1 on Sheet 4

# CONSTRUCTION RUNOFF CONTROL INSPECTION FORM (CRCIF) C-107 DEFICIENCY DESCRIPTION SHEET

MT

Project Name/ID	UPC	<b>V</b>
Contractor		
Inspection Date	 •	

ITEM#	STATION	DESCRIPTION OF PROBLEM, LOCATION, AND RECOMMENDED CORRECTIVE ACTION (SEE NOTE 5)	DATE TO BE CORRECTED BY	DATE CORRECTIVE ACTION COMPLETED

## CONSTRUCTION RUNOFF CONTROL INSPECTION FORM (CRCIF) C-107 NOTES AND ACRONYMS SHEET

## **NOTES**

- 1. If any "No" boxes are checked on the "Inspection Questions List" on Part I or if any other deficiencies of a contract specification plan item or SWPPP requirement is noted, the C-107 Deficiency Description Sheet is to be used to document the specifics of the deficiency. The description of the deficiency must contain (1) the permit condition deficiency, if applicable, (2) a description of the deficiency, (3) a corrective action deadline (should be as soon as practical and prior to the next anticipated measurable storm event but no later than seven days after the date of the site inspection that identified the deficiency) and (4) a recommended solution or approach. If this is a follow-up inspection, previous deficiencies that have been corrected must be documented as such. If conformity to specifications and plans is being achieved but the site conditions indicate that plan or specification adjustments may be needed to address environmental concerns, such conditions should be immediately referred to the designated Responsible Land Disturber (RLD) for resolution
- 2. The Part I inspection and report is to be completed in accordance with the inspection schedule in the specifications and signed and submitted by a Contractor employee who is certified in accordance with VDOT R&B Specification 107.16(a).
- 3. The Part I report is to be accepted, confirmed and signed by a VDOT employee or a consultant inspector working directly for VDOT on a CEI services contract who is certified by DEQ as an Inspector for ESC and who is knowledgeable in the area of pollution prevention practices at construction sites. Confirmation shall be in the form of a joint inspection with the Contractor ESCCC employee or an independent inspection by the VDOT Certified Inspector.
- 4. All original completed C-107 Forms are to be maintained with the other SWPPP documents for the land disturbing activity. Copies of this report are to be provided to the Contractor, the VDOT Project Inspector and the Project Engineer/ RLD.
- 5. For Part I, non-compliant, non-compliance, or deficient is defined as documented evidence of (1) off-site damage in the form of sedimentation, unauthorized dewatering or pollutant discharge, erosion, flooding, encroachment outside of the project/permit limits, or a permit condition deficiency, (2) on-site damage in the form of significant erosion, flooding, sedimentation or uncontrolled pollution discharge, or (3) a previous deficiency that has not been corrected within the specified timeframe.
- 6. For the purposes of this document, a day is a calendar day unless otherwise stated.
- 7. The weekly inspection schedule in Special Provision S107J30 dated 9/3/14 is the same as a Schedule 1 on this form. When performing inspections in accordance with the weekly schedule in S107J30 dated 09/3/14, check the Schedule 1 box on this form.
