**CG-12, Type B Layout <u>without</u> Buffer Strip**

FIGURE A-5-18 TYPE B LAYOUT <u>WITHOUT</u> BUFFER STRIP

There may be situations where <u>right of way restrictions</u> dictate the above ramp configuration. **It should not be used where right of way or a pedestrian access route continues around the curve**. The bottom of the ramp may be located to the left of the curb return in the above example; however the ramp width shall <u>not</u> be less than 48" at the bottom.
