

SECTION C-3 RIGHT OF WAY

POLICY

The type of Right of Way Monuments to be used will be determined at the Field Inspection.

The District Engineer's Field Inspection Report will indicate whether concrete Right of Way Monuments, Std. RM-1 or steel pin Right of Way Monuments, St'd. RM-2, are to be used.

When both types are recommended, the location of each type will be specified.

Right of Way Monuments will be set by State Forces unless otherwise denoted on the plans. This should be discussed at the Pre-Advertisement Conference (PAC) meeting.

ST'D RM-1

The St'd. Right of Way Monument, St'd. RM-1, is concrete and will be used at locations as recommended by the District Survey Manager or responsible charge at the Field Inspection.

ST'D RM-2

The St'd. Right of Way Monument, St'd. RM-2 uses a steel pin with cap and locator post.

The St'd. RM-2 monument is not a replacement for the concrete monument (St'd. RM-1), but will be used at locations as recommended by the District Survey Manager or responsible charge at the Field Inspection.

GENERAL NOTES

General Notes are to be shown in accordance with [IIM-LD-110](#).

PLANS

Projects containing both types of monuments should have each type clearly noted.
