

It is imperative the survey parties retrieve any data in this program when a bridge site survey is needed. The Survey Party Manager will request this data from the District Hydraulic Unit prior making a bridge site survey.

The data can be requested and retrieved by the following systems:

1. District - All data for District
2. County - All data for County
3. Route - All data for Route in District
4. Route over called river - All data for route over river in District
5. River in called county - All data for river in County
6. River in called District - All data for river in District

All high water data will be submitted to the District Hydraulic Unit by memorandum, when the bridge site plans and data sheets are transmitted to the Central Office, or for secondary roads, when sent to the District Bridge Unit. The District Hydraulic Unit will then input the data into the program.
