

This sheet must be kept current by making the changes indicated by the Right of Way Division. Changes made subsequent to submission of approved Right of Way plans will be considered "formal" revisions. The Preliminary Right of Way Data Sheet will be used beginning at field inspection and will become the "Final" Right of Way Data Sheet."

Right of Way Division's Building Data Report will be furnished to the Designer ninety days prior to advertisement. This report will confirm regular demolition numbers (D-1, D-2, etc.) as well as furnish special "D" series numbers for any underground storage tanks, "non-significant" signs or real personal property on the project (See page 2F-1, PARCEL NUMBERS AND DEMOLITION NUMBERS ON PLANS).
