

SECTION 2C – 7 - SOLICITING COMMENTS WITHIN DIVISION AND COMPLETING DESIGN

SOLICITING COMMENTS WITHIN DIVISION

In order that all disciplines within the Location and Design Division are given an opportunity to provide input into the total design, plans are made available through Falcon, for review prior to [Preliminary Field Inspection](#). The Hydraulics Section must review the preliminary design plans at this stage and furnish recommendations, comments, and questions relative to drainage that are pertinent to the Preliminary Field Inspection and the resolution of a proper design. The appropriate design section must review the design for conformity to current VDOT [Road and Bridge Standards](#) and make recommendations concerning the design features shown.

INCORPORATING COMMENTS INTO DESIGN

Upon receipt of comments, questions and recommendations, they are to be reviewed and a common solution determined and shown as the Division's proposals on the preliminary design scheme of development. Should time not permit the resolution of these matters, they are to be discussed at the Preliminary Field Inspection. In any event, the Preliminary Field Inspection is to consider all input that could lead to the most feasible scheme of development.
