

The NPRM exceptions for openings are included in 302.3 of the ADA-ABA Accessibility Guidelines.*

Where resting intervals are provided adjacent to the trail, a turning space is required.

Provisions are added for gates and barriers constructed to control access to trails.

The scoping provisions for trails also address camping facilities, picnic facilities, viewing areas, and outdoor constructed features provided on trails. These facilities are required to comply with the applicable scoping and technical provisions for each facility, regardless of whether the trail complies with the technical provisions in 1017. Individuals with disabilities use trails that do not comply with the technical provisions of 1017 and, therefore, facilities provided on such trails are required to be accessible. Camping facilities, picnic facilities, viewing areas, and outdoor constructed features provided on trails are connected to a trail, and are not required to be connected to an outdoor recreation access route. See 1019 Conditions for Exceptions.

Trailhead

Trailheads are defined in F106.5 as an outdoor space developed to serve as an access point to a trail. The junction of two or more trails, where no other access point is provided to the trails, is not a trailhead.

The scoping provisions for trailheads are contained in F247.4. The provisions require new signs provided at trailheads on newly constructed or altered trails to include information on the length of the trail or trail segment; surface type; typical and minimum tread width; and typical and maximum running slope and cross slope. The U.S. Forest Service currently provides this information on trailhead signs posted on certain trails in national forests.

The scoping provisions require at least 20 percent of each type of outdoor constructed feature provided within a trailhead to be accessible. The scoping provisions also require an outdoor recreation access route to connect accessible parking spaces or other site arrival points to the accessible outdoor constructed features, elements, spaces, and facilities within the trailhead.
