EXAMPLE OF A SIGN SCHEDULE
(See Appendix IIA-6)

A Sign Schedule sheet provides detailed information about all signs to be installed on the project. The following subsections will discuss the data needed on the Sign Schedule. To illustrate and detail the information shown on the Sign Schedule, Sign No. 74 in [Appendix IIA-6](#) will be used as an example.

4.3.1 Text Number

The sign text number column, as shown in Figure 4-3, is determined by numbering the sign text from one through the number of signs, or grouping of signs, illustrated in the text column. Signs or grouping of signs that are alike should have the same text number. The text numbers shall match the bottom half of the circle of the signs on the plan sheet(s) for which it applies.

It is also desirable to arrange the signs in the following order: Regulatory signs, Warning signs, Guide signs. It is recommended to use the Standard Highway Signs Book when determining the type and order of signs to be presented on the Sign Schedule.

4.3.1a Text

The text column, as shown in Figure 4-3, illustrates a graphic view of the sign and message.
