

TABLE OF CONTENTS

CHAPTER 1 - INTRODUCTION 1-1

 IGrds Input Options..... 1-3

 Input 1-3

 Output 1-4

 Manuals 1-4

 Organization of This Manual 1-5

CHAPTER 2 - GENERAL IGrds CONCEPTS 2-1

 Coordinate System 2-5

 Stations and Offsets..... 2-5

 Equations 2-5

 Imperial and Metric Units 2-6

 General Support Features..... 2-6

 IGrds Project .ini File 2-6

 Parameter Files and Cell Libraries 2-7

 Template, Sideslope and Median Shape Libraries..... 2-7

 Material Criteria Tables 2-7

 Feature Tables..... 2-8

 Design Criteria Table..... 2-8

 IGrds Data Import/Export..... 2-8

CHAPTER 3 - GEOMETRY PROCESSES 3-1

 Two Dimensional Plan View Coordinate Geometry Functions..... 3-3

 Three Dimensional Coordinate Geometry Functions..... 3-3

 Horizontal Alignment Related Geometry Functions..... 3-4

 Bridge Geometry Functions 3-5

 Geometry Plotting 3-5

 Command Structured Language - IGrds/AN..... 3-5

 IGrds/AN/IG Option Considerations 3-6

 Ramp Design and Special Geometry Functions 3-6

 MicroStation Elements Used As IGrds Elements 3-7

CHAPTER 4 - TERRAIN DATA..... 4-1

 Terrain Cross Section Data 4-1

 Multiple Baselines..... 4-1

 DTM Cross Sections and Profiles..... 4-3

 Cross Section Input Process..... 4-3

 Design Cross Sections..... 4-4

Final Cross Sections	4-5
DTM Method	4-5
3D Design File Method	4-5
Cross Section Method.....	4-5
Cross Section Modification	4-5
CHAPTER 5 - ROADWAY DESIGN DATA.....	5-1
Horizontal Alignments.....	5-3
Geometry	5-4
Terrain Cross Sections	5-4
Horizontal Position Calculations	5-4
Terrain Profile	5-5
Vertical Alignment.....	5-5
Template Processes	5-7
Template Shapes.....	5-7
Template Stations	5-8
Superelevation	5-8
Widening (Widths and Transition Lengths).....	5-8
Geometric Template Modification (Template Point Control by Geometry Elements).....	5-8
Median Processes	5-11
Median Shapes.....	5-11
Median Stations	5-11
Special Ditch Grades	5-11
Sideslope Processes.....	5-13
Sideslope Shapes	5-13
Sideslope Stations.....	5-13
Special Ditch Grades	5-13
Erosion Control Ditches	5-15
Maximum Slope Intercept.....	5-15
Other Design Section Modifications	5-16
Automatic Generation of Design Data	5-18
Design Criteria Table.....	5-18
Roadway Design Parameters Dialog Box	5-18
Automatic Curvature for Horizontal PIs	5-19
Automatic Superelevation an Transition Length	5-19
Automatic Pavement Widening on Sharp Horizontal Curves.....	5-20
Automatic Vertical Curve Lengths and Adjustments	5-20
Design Sequence	5-20

CHAPTER 6 - CREATION OF DESIGN CROSS SECTIONS	6-1
Design Process - Without Subsurface Data.....	6-1
Design Exceptions	6-2
Horizontal Position Calculation	6-2
ROW and Maximum Slope Intercept Update.....	6-2
Design Process - With Subsurface Data	6-8
Material Criteria Table	6-8
Sideslope Process - with Subsurface Data	6-8
Design Process Reports.....	6-11
Modifying Design Cross Sections	6-11
 CHAPTER 7 - EARTHWORK COMPUTATIONS	 7-1
Earthwork Parameters	7-1
Compaction Factors.....	7-2
Forced Balance Stations	7-2
Added Quantities	7-2
Volume Calculations and Mass Ordinates	7-3
Haul Calculations	7-3
Construction Staking.....	7-6
Topsoil Placement and Seeding.....	7-6
Earthwork Computation Requests	7-7
Final Volumes	7-7
Method of Final Volume Computation	7-8
Earthwork Computation Reports	7-9
Pavement Structure Quantities.....	7-9
 CHAPTER 8 - GRAPHIC OUTPUT.....	 8-1
Synchronized View	8-2
Cross Section Displays.....	8-3
Cross Section Plots.....	8-3
Cross Section Feature Code Display	8-4
Superelevation Diagram.....	8-5
Profile Plots	8-5
Three Dimensional Surfaces from IGrds Road Designs	8-6
Drive Through Methodology for IGrds Design Projects.....	8-6
IGrds/AN Option Plots.....	8-7
 CHAPTER 9 - TYPICAL DESIGN SCENARIO	 9-1
New Construction Projects - Urban or Rural	9-1
Example Projects.....	9-4

APPENDIX A - STATIONING AND EQUATIONS	A-1
APPENDIX B - HORIZONTAL ALIGNMENT	B-1
Locating PIs by Projection	B-3
Automatic Generation of Design Data	B-3
Design Criteria Table.....	B-3
Roadway Design Parameters Dialog Box	B-4
Automatic Curvature for Horizontal PIs	B-4
Automatic Superelevation and Transition Length	B-5
Automatic Pavement Widening on Shape Horizontal Curves	B-5
Parallel Horizontal Alignments	B-5
Copying Horizontal Alignments	B-6
Horizontal Alignment from a Geometry Chain.....	B-6
Horizontal Alignment by Offset	B-6
APPENDIX C - THREE DIMENSIONAL GEOMETRY	C-1
Geometry Element Elevation Assignment	C-1
Elevation Tool	C-1
Geometry Point Elevations.....	C-2
Geometry Line Elevations	C-3
Geometry Arc Elevations	C-4
Geometry Chain and Shape Elevations.....	C-5
Geometry Element Elevation Computation.....	C-6
Referenced Geometry Points.....	C-6
Points Along Elements	C-6
Elements Tangent to Elements.....	C-6
Elements Projected to Elements.....	C-7
Elements Parallel to Elements.....	C-8
Points at Intersections	C-8
Measurements and Calculations.....	C-8
Geometry Element Profiles.....	C-9
Geometry Element 3D Shapes	C-9
3D Shapes	C-9
Alignment Point.....	C-9
MicroStation Cells.....	C-10
Geometry Elements Projected into Reference Lines and IGrds Cross Section Views	C-13
APPENDIX D - PROFILE GRADE - VERTICAL ALIGNMENT	D-1
Using Dynamic Vertical Alignment Process.....	D-2
Elevation Corrections.....	D-3
VPis from DTM	D-4
VPis from IGrds Design Surfaces.....	D-4
Profile Grade from Natural Ground.....	D-5
Automatic Data Generation	D-5

Design Criteria Table.....	D-5
Roadway Design Parameters Dialog Box	D-5
Automatic Vertical Curve Lengths and Adjustments	D-6
Vertical Geometry Commands	D-12
 APPENDIX E - TEMPLATE PROCESSES.....	 E-1
Roadway Template Shapes	E-1
Template Types.....	E-2
Template Segments.....	E-4
Slope Segment Options	E-4
Off Template Control	E-10
Trenched Subgrade	E-13
Flat Slope Criteria.....	E-15
Stepped Subgrade	E-16
Template Stations.....	E-16
 APPENDIX F - SUPERELEVATION	 F-1
Relation of Profile Grade Point to Pivot Points	F-3
Transition Type	F-3
Transition Method.....	F-3
Compounding and Reversing (Superelevation Types 0 and 4 Only).....	F-8
Automatic Curvature and Superelevation Rate Calculations.....	F-14
Rural and High Speed Urban.....	F-14
Low Speed Urban	F-15
Automatic Superelevation and Widening Transition Length Calculations	F-16
1990/1994 Standards Computational Methodology	F-16
2001 Standards Computational Methodology	F-19
Automatic Crown Runoff Length Calculations.....	F-22
Normal Method (Flag = 0)	F-22
Alternate Method (Flag = 1).....	F-23
 APPENDIX G - WIDENING.....	 G-1
Widening Process.....	G-1
Geometric Template Modification	G-4
Horizontal Control Only.....	G-4
Horizontal and Vertical Control.....	G-5
Horizontal and Vertical Slope Control.....	G-5
Automatic Pavement Widening on Sharp Horizontal Curves	G-6

APPENDIX H - MEDIAN PROCESSES	H-1
Median Shapes	H-1
Roadways That Overlap	H-3
Overlapping Medians That Do Not Intersect	H-4
Medians That Intersect	H-6
Special Median Options	H-7
Median Stations.....	H-9
APPENDIX I - SPECIAL DITCHES	I-1
Special Ditches	I-1
Special Ditch Definition.....	I-1
Grade Line Type	I-1
3D Geometry Element Type.....	I-2
Sideslope Special Ditches	I-2
S Special Ditch - Segment Slope Held.....	I-2
D Special Ditch - Segment Horizontal Distance Held.....	I-4
T Special Ditch - Segment Slope Held from Geometry Element.....	I-4
E Special Ditch - Segment Horizontal Distance Slope Held from Geometry Element	I-4
G Special Ditch - 3D Geometry Element Controls End of Segment	I-4
Median Special Ditches	I-4
APPENDIX J - SLOPE SELECTION PROCESS	J-1
Sideslope Shapes	J-1
Slope Segment Options	J-3
Control of Catch Point.....	J-8
Additional Sideslope Capabilities.....	J-10
Automatic Fill Widening.....	J-10
Slope Rounding	J-10
Erosion Control Ditches	J-11
Slope Selection Process Logic	J-12
Multiple Subsurface Slope Selection Logic	J-15
Sideslope Stations	J-16
APPENDIX K - ROW MAXIMUM SLOPE INTERCEPTS	K-1

APPENDIX L – METRIC/IMPERIAL CONVERSION UTILITY	L-1
User Interface	L-1
Configuration Table	L-1
File Types That Are Converted.....	L-1
Conversion Methodology.....	L-2
IGrds Configuration (.ini) File.....	L-2
Geometry (.geo) File.....	L-2
Horizontal Alignment (.hal) File.....	L-2
Design Data (.dda) File.....	L-3
Shape Data (.dtb) File.....	L-3
Support Files.....	L-3
APPENDIX M - RAMP DESIGN AND ROADWAY DESIGN TOOLS.....	M-1
Ramp Design Tools.....	M-1
General Ramp Design Command Capabilities	M-1
Other Roadway Design Tools.....	M-5
Reverse Curves Command Capabilities.....	M-5
Radial Offsets Command Capabilities.....	M-9
Median End Design Command Capabilities.....	M-9
Alignment Intersection Command Capabilities.....	M-11
Right-of-Way Stakeout Command Capabilities	M-11
APPENDIX N - SURFACE MATERIAL REMOVAL AND TEMPLATE SUBCUT	N-1
Surface Material Removal Process	N-1
Removal Limits	N-1
Cut Slope.....	N-6
Removal Shape	N-6
Median Removal.....	N-7
Material Sensitivity.....	N-8
Process Methodology	N-8
Output	N-11
Template Subcut Process	N-12
Subcut Type	N-12
Subcut Limits.....	N-12
Subcut Depth	N-15
Subcut Shape	N-19
Material Sensitive	N-19
Process Methodology	N-19

APPENDIX O - DIGITAL TERRAIN MODEL PROCESSING CAPABILITY.....	O-1
DTM Processing.....	O-2
Computation Algorithms	O-4
Profile Breaks	O-4
Cross Section Filtering	O-4
APPENDIX P - PAVEMENT STRUCTURE QUANTITIES.....	P-1
Pavement Structure Quantities Process	P-1
Pavement Structure Limits.....	P-1
Process Requirements and Methodology	P-3
Baseline Station Processing.....	P-3
Pavement Structure Sections.....	P-3
Pavement Structure Quantities Computation.....	P-4
Linear Material Computations.....	P-4
Area Material Computations	P-4
Volume Material Computations.....	P-4
Alternative Units.....	P-4
Output	P-5

LIST OF FIGURES

CHAPTER 2 - GENERAL IGrds CONCEPTS 2-1

 2-1 Three Dimensional Model..... 2-2

 2-2 Horizontal Plane Coordinates..... 2-3

 2-3 Vertical Plane Coordinates 2-3

 2-4 Cross Section Plane 2-4

CHAPTER 3 - GEOMETRY PROCESSES 3-1

 3-1 Geometry Elements 3-2

 3-2 3D Geometry Elements 3-4

CHAPTER 4 - TERRAIN DATA..... 4-1

 4-1 Terrain Data 4-2

CHAPTER 5 - ROADWAY DESIGN DATA..... 5-1

 5-1 Design Cross Sections 5-2

 5-2 Roadway Templates 5-9

 5-3 Roadway Templates with Superelevation and Widening 5-10

 5-4 Median Examples 5-12

 5-5 Sideslope Shapes 5-14

 5-6 Variable Segments 5-14

 5-7 Maximum Slope Intercept 5-15

 5-8 Off Template Control 5-16

 5-9 Trenched Subgrade Sections with Slope Rounding..... 5-17

 5-10 Surface Material Removal and Template Subcut 5-17

 5-11 Interaction of Design Section Processes 5-21

CHAPTER 6 - CREATION OF DESIGN CROSS SECTIONS 6-1

 6-1 Terrain Offsets 6-3

 6-2 Maximum Slope Intercept 6-3

 6-3 Roadway Template Established 6-6

 6-4 Median Connections Established 6-6

 6-5 Sideslopes Established..... 6-6

 6-6 Completed Design Cross Section..... 6-7

CHAPTER 7 - EARTHWORK COMPUTATIONS	7-1
7-1 Printer Haul Plot	7-4
7-2 Digital Haul Plot	7-5
APPENDIX A - STATIONING AND EQUATIONS	A-1
A-1 Examples of Equation Numbering and Stationing Scheme - Imperial Units.....	A-2
A-2 Examples of Equation Numbering and Stationing Scheme - Metric Units	A-3
A-3 Equations - Imperial Units.....	A-4
APPENDIX B - HORIZONTAL ALIGNMENT	B-1
B-1 Alignment	B-2
B-2 Offset Alignments.....	B-7
APPENDIX C - THREE DIMENSIONAL GEOMETRY	C-1
C-1 3D Geometry Points	C-2
C-2 3D Geometry Lines.....	C-3
C-3 3D Geometry Arcs.....	C-4
C-4 3D Geometry Chains and Shapes.....	C-5
C-5 Isometric View of Element Tangent to Elements	C-7
C-6 Isometric View of Elements Projected to Elements	C-7
C-7 Isometric View of Points Created at Intersections.....	C-8
C-8 Examples of Geometry Element Profiles.....	C-10
C-9 3D Shapes and Cells Attached to Geometry Elements.....	C-11
C-10 3D Shape Types.....	C-11
C-11 3D Shape Alignment Points	C-12
C-12 Examples of Projected Geometry Elements.....	C-13
APPENDIX D - PROFILE GRADE - VERTICAL ALIGNMENT	D-1
D-1 Sight Distance Check Report	D-9
D-2 Adjustment Strategy - When Overlap Exists	D-10, D-11
APPENDIX E - TEMPLATE PROCESSES.....	E-1
E-1 Illustration of Resulting Subgrade Using Template Slope Option F.....	E-3
E-2 Illustration of Resulting Subgrade Using Template Slope Option Blank	E-3
E-3 Stepped Subgrade Example - Normal Crown.....	E-16
E-4 Stepped Subgrade Example - Superelevated	E-16

APPENDIX F - SUPERELEVATION	F-1
F-1 Pivot Point Locations.....	F-2
F-2 Transition Types	F-4
F-3 Segment Rotation, Types 0 and 4.....	F-5
F-4 Superelevation Transitions, Types 0 and 4	F-6
F-5 Compounded Curves	F-9
F-6 Reversed Curves with Same Left and Right Pivot Points	F-10
F-7 Reversed Curves with Different Left and Right Pivot Points.....	F-11
APPENDIX H - MEDIAN PROCESSES	H-1
H-1 Example Median Input and Results	H-8
APPENDIX I - SPECIAL DITCHES	I-1
I-1a S Special Ditch Option, Grade Line Type Special Ditch.....	I-3
I-1b S Special Ditch Option, 3D Geometry Element Type Special Ditch	I-3
I-2a D Special Ditch Option, Grade Line Type Special Ditch.....	I-3
I-2b D Special Ditch Option, 3D Geometry Element type Special Ditch.....	I-3
I-3 T Special Ditch Option	I-5
I-4 E Special Ditch Option	I-5
I-5 G Special Ditch Option	I-5
APPENDIX M - RAMP DESIGN AND ROADWAY DESIGN TOOLS.....	M-1
M-1 Example of General Ramp Design Capabilities	M-2
M-2 Three-Center Curve Loop Design	M-4
M-3 Three Center Curve Solution Options.....	M-6
M-4 Reverse Curve Ramp Alignment	M-7
M-5 Reverse Curve Left Turn Lane Transition	M-8
M-6 Radial Offset Command Capabilities	M-10
M-7a Median End Design Parameters	M-12
M-7b Median End Design Parameters	M-13
M-8 Alignment Intersection Command Example.....	M-14
APPENDIX N - SURFACE MATERIAL REMOVAL AND TEMPLATE SUBCUT	N-1
N-1a Surface Material Removal Process	N-2
N-1b Surface Material Removal Process	N-2
N-1c Surface Material Removal Process	N-2
N-1d Multiple Zone Surface Material Removal Processing.....	N-3
N-2a Distance from Left or Right Catch Point	N-4
N-2b Distance from Left or Right Centerline.....	N-4
N-2c Slope from Left or Right Shoulder Point	N-4
N-2d Distance from Left or Right Shoulder Point	N-5
N-2e Geometry Element as Removal Limit.....	N-5

N-3a	Surface Material Removal Shapes	N-7
N-3b	Surface Material Removal Shapes	N-7
N-4a	Surface Removal - Material Sensitive Conditions.....	N-9
N-4b	Surface Removal - Material Sensitive Conditions.....	N-9
N-4c	Surface Removal - Material Sensitive Conditions.....	N-9
N-5a	Typical Rural Subcut for Moisture and Density Control.....	N-13
N-5b	Typical Urban Subcut for Unsuitable Material Removal	N-13
N-5c	Template Subcut Material Sensitivity	N-13
N-6	Typical Rural and Urban Template Subcut Sections.....	N-14
N-7	Reference Distances - Rural and Urban Options	N-16
N-8a	Template Subcut Slope and Depth Parameters - Rural Option	N-17
N-8b	Template Subcut Slope and Depth Parameters - Urban Option	N-18
N-9a	Subcut Section Follows Subgrade Template - Rural	N-20
N-9b	Subcut Section Follows Straight Line Between Shoulder Points - Rural	N-20
N-9c	Subcut Section Follows Subgrade Template - Urban.....	N-21
N-9d	Subcut Section Follows Straight Line Between Lowered End Points - Urban....	N-21
N-10a	Subcut Material Sensitive Conditions.....	N-22
N-10b	Subcut Material Sensitive Conditions.....	N-22
N-10c	Subcut Material Sensitive Conditions.....	N-22
N-11a	Template Subcut Section versus Terrain Surface (All Cut)	N-26
N-11b	Template Subcut Section versus Terrain Surface (Cut and Fill).....	N-26
N-11c	Template Subcut Section versus Terrain Surface (All Fill).....	N-26
N-12a	Template Subcut Section versus Surface Material Removal Section (All Cut)...	N-27
N-12b	Template Subcut Section versus Surface Material Removal Section (Cut and Fill)	N-27
N-12c	Template Subcut Section versus Surface Material Removal Section (All Fill)...	N-27
APPENDIX O - DIGITAL TERRAIN MODEL.....		O-1
O-1	Filtered Cross Section.....	O-6
O-2	Non-Filtered Cross Section	O-6
APPENDIX P - PAVEMENT STRUCTURE QUANTITIES.....		P-1
P-1	Ridgeline Points.....	P-1
P-2	Various Types of Pavement Structures	P-2
P-3	Pavement Structure Sections Computation.....	P-3

LIST OF TABLES

CHAPTER 6 - CREATION OF DESIGN CROSS SECTIONS 6-1

 6-1 Summary of Design Data Types..... 6-4

 6-2 Design Sequence for Individual Design Section..... 6-9

APPENDIX J - SLOPE SELECTION PROCESSJ-1

 J-1 Slope Selection OptionsJ-4, J-5
