Computer Operations Procedures

Title Electronic Plan TIFF file generation	Number: S&B CO – 2002-07
Approved by:	Version: 1.0
	Date: 10/24/02

To Generate TIFF files from MicroStation for use with electronic plan submission:

- 1 Fence object as if you were going to plot.
- 2 Then, go to: Applications > eQuorum Plotting > PRF Generator

Consultants will need to provide VDOT with PDF files. VDOT staff will continue to generate TIF files using eQuorum plotting. However a process in the background will convert the TIF to PDF before the files are added to Falcon.

3. In the Active Cfg: box, select CONFIG Bridge TIF File Generator

A TIFF file will be created after “clicking” on the “Create+Submit PRF” button

The newly created file will have the same name as the MicroStation DGN file but it will have a PDF extension. It will be automatically moved to a directory, renamed and processed according to the Generate Tif choice made under the File Format Keywords tab in the Falcon Document Manager.
