

- b. Small to Medium Street Trees: These trees are also suitable for street tree planting where overhead utilities may be nearby, thus requiring a smaller crown. These trees may be planted in the planting strip between the roadway and the sidewalk, provided they are outside the clear zone.

- *Cercidiphyllum japonicum*      Katsuratree
- *Pistacia chinensis*              Chinese Pistache (Male Only)
- *Acer buergerianum*              Trident Maple
- *Koelreutaria panniculata*      Golden Raintree
- *Quercus accutissima*          Sawtooth Oak

- c. Flowering Trees suitable for accent or focal area: While having a low branching pattern, these trees are generally large enough at maturity to reach above the height above a pedestrian, or compact enough to remain within a confined space. Care should be taken when locating very low branched or multi-stem varieties as not to obstruct sight lines, and to keep heavily fruiting varieties away from sidewalks. These trees may be planted in the planting strip between the roadway and the sidewalk.

- *Aesculus x carnea*                Red Horse Chestnut
- *Aesculus parvifolia*            Bottlebrush Buckeye
- *Amelanchier canadensis*      Serviceberry
- *Cercis canadensis*              Eastern Redbud
- *Cercis chinensis*                Chinese Redbud
- *Cornus florida*                  Flowering Dogwood
- *Cornus kousa*                    Korean Dogwood
- *Chionanthus virginicus*        White Fringetree
- *Halesia tetraptera*              Carolina Silverbell
- *Lagerstromia indica*            Crape Myrtle
- Improved fruitless varieties of *Pyrus calleryana* such as "Chanticleer" or "Cleveland Select"
- *Prunus yedoensis*              Yoshino Cherry
- *Prunus serrulata*                Kwanzan Cherry
