

The identification numbers "B" or "D" are to be requested by the Project Manager using the Project Pool and will be assigned initially in sequence, without regard to the prefix "B" or "D"; i.e. B-601, B-602, D-603, D-604, B-605, etc. Construction Type Codes for roadway and surface type, bridge type (includes culverts - any type box or culvert), and miscellaneous type construction are required for each construction section on all projects, e.g., C-501, B-601, D-602, C-502, L-801, S-901, etc. The Type Codes, as noted in Figure 2E-10*, are required on the plans and are to be shown on the title sheet in the project length tabulation block adjacent to the Federal-Aid Project number block (regardless of whether the project is federally funded) for the applicable Section Number.

No Plan and Minimum Plan project Type Codes are to be shown on the title or cover sheet and are to be handled in variations of the above procedure, as required. This is also to apply to project plans, such as Landscape, Signs, etc., prepared by other divisions that do not require road plans.

The Bridge Type Code is noted on the bridge plan cover sheet in the upper right hand border beside the project block and also on their final review transmittal Form B-45A or B-45B adjacent to the copy transmittal listing to the FHWA as - Bridge Type Code: X.

The Type Code is also to be shown in the Engineering Estimate.
